

BELLISSIMO COLLECTION

800x 1600 mm

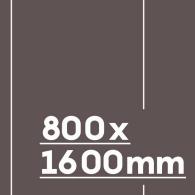

ARRAY OF COLORS

4 COLORS

The Bellisimo Series in 800x1600mm size comes in a variety of four colors, each hue representing the down-to-earth dignity that spells class and grace. These ever-popular hues leave you spellbound with a heartwarming experience that evokes awe and admiration for ceramic artistry.

Each shade is inspired by the earthy elements expressing the subdued moods of terrene that fill your spaces with eternal beauty and unparalleled sophistication that is just perfect for contemporary architecture.

SURFACES ENGINEERED TO PERFECTION

Granolith Surface_

Glazed Vitrified Tiles

Tile Body

The nest quality raw materials make up the resilient and robust tile body of our tiles. The raw materials are ethically sourced and sustainably processed.

Engobe Layer

A highly opacious, fusible, and permeable engobe layer makes the second layer of the tiles of our.
The layer makes the tiles highly resistant to water absorption for longevity.

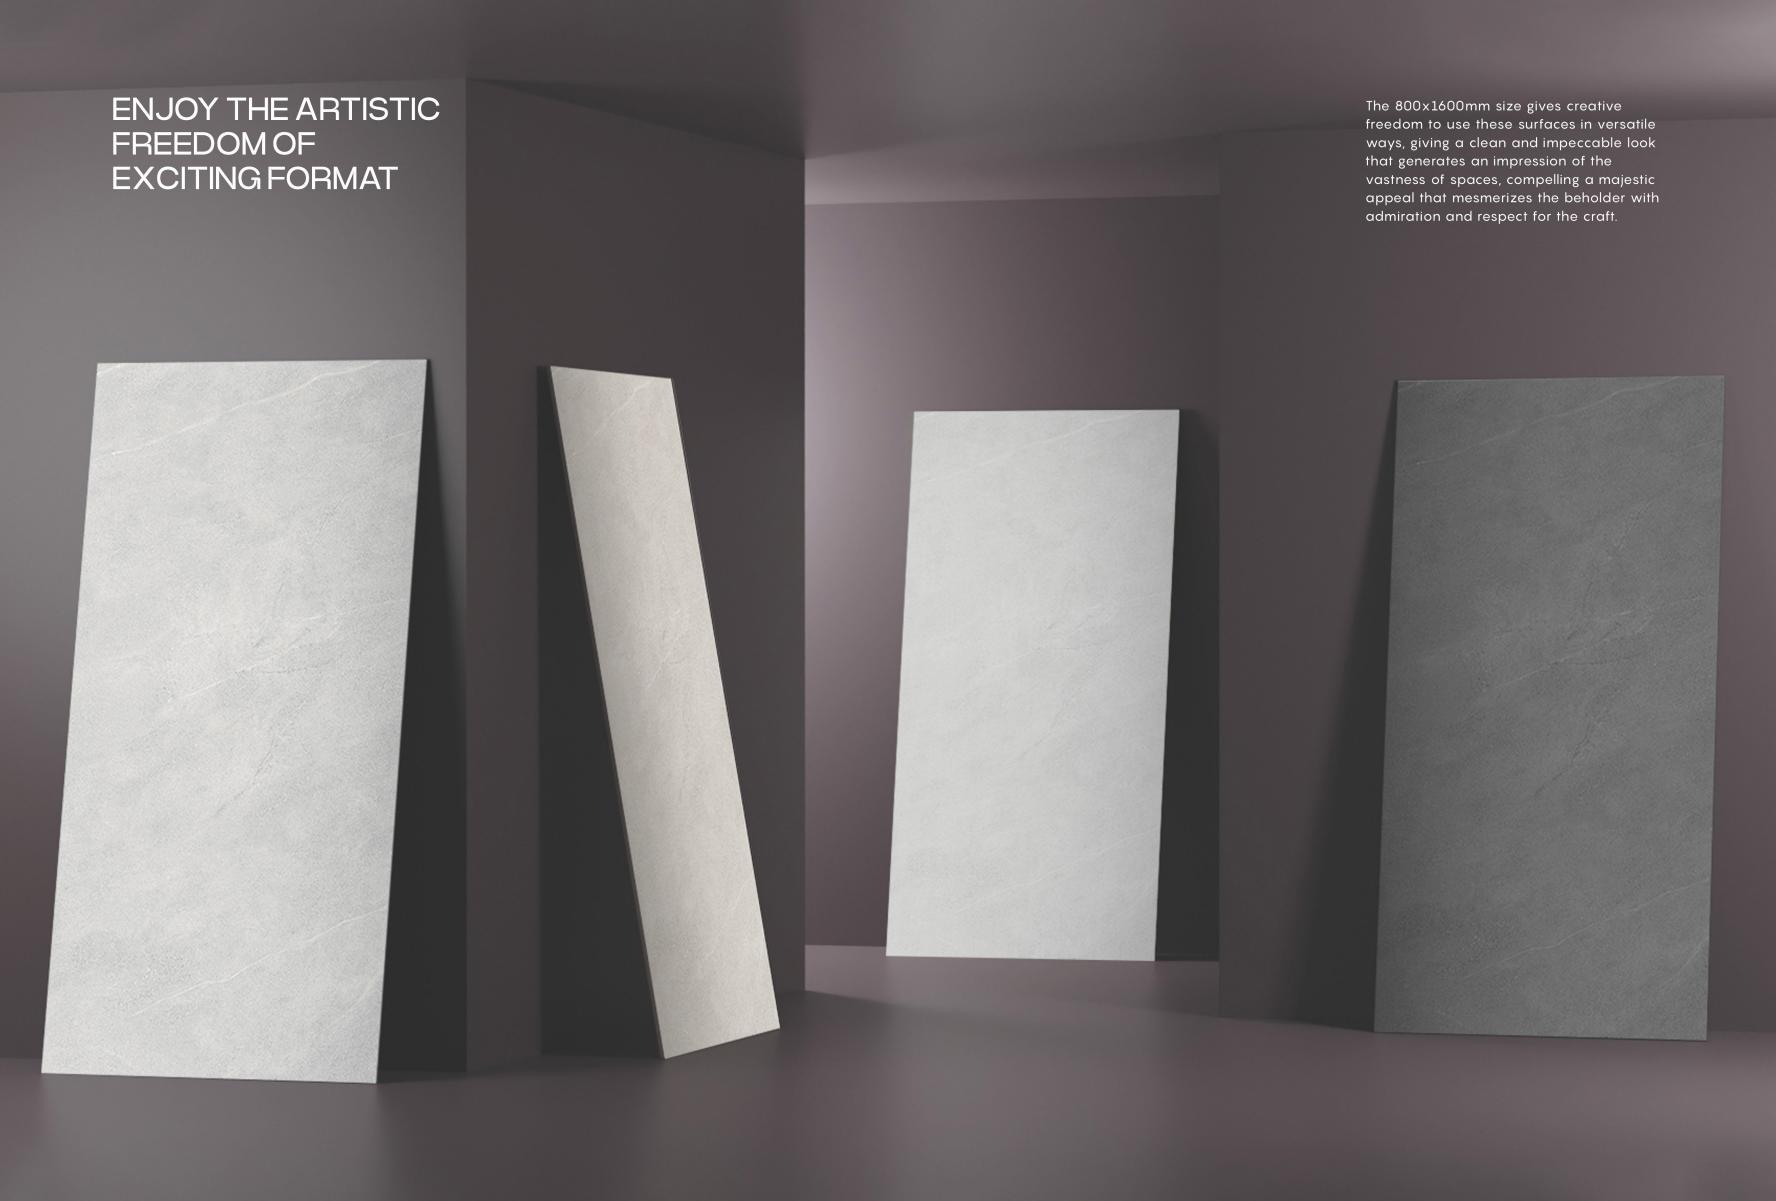

High Pigment Digital Printing Ink

The our surfaces get their unique and versatile properties of the design, color, and more in this stage where digital printing is done on the glaze with high pigment ink for excellent results.

Glaze Layer

A high-quality glaze coating is added to the engobe layer of the our tiles giving the tile properties of texture and shine and making them ready for design and color.

EASY TO CLEAN

The superior glaze of the collection makes the surfaces easy to clean and low maintenance.

STAIN RESISTANT

Do not worry about spills and stains with the high stain-resistant glaze of the premium our surfaces.

SCRATCH RESISTANT

Enjoy new-looking surfaces for a very long time with highly scratch and abrasion-resistant surfaces.

Technical Features:-

Easy To Maintain

Resistant To Chemicals

Prevents Bacterial Heat Resistant Growth

UV Resistant

Resistant To Acids

Non-slip

Water Proof

Frost Resistant

M

Fire Resistant

Dimensional

Ecological

Application Areas:-

Residence

Shops

Offices

Airports

Hotels

Public Places

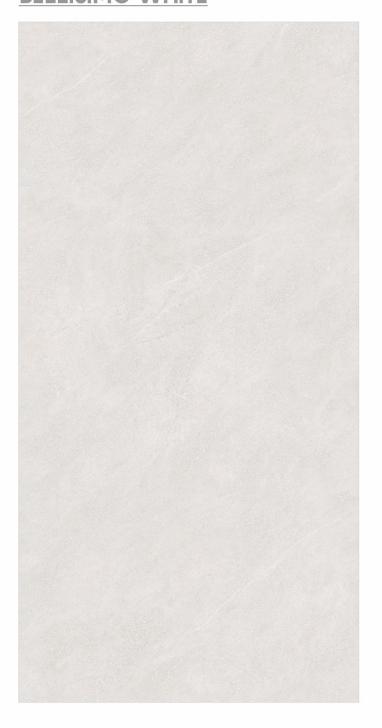

Malls

Laying & Levelling

Cement Laying On Tile

Fixing The Tile

Spacers + Laveller

Lavelling Wedges

After Lavelling Process Leave Int For 8-10 Hrs.

Remove Wedges Ones It Dry

Final Cleaning

Floor and Wall Installation

- First spread the cement mixer onto the floor and wall substrate.
 At the same time, apply the cement mixer onto the back of the slab with a tile trowel.
 The recommended cement mixer must be spread over in one direction only.
 Using a trowel and follow the same direction as previously applied to the back of the slab.
 Being careful to maintain a minimum joint of 3mm.
 Tab the slab with a rubber trowel for a complete fixing, ensuring the air is expelled.
 It is recommended to start from the centre of the slabs and then move towards the edges.

 Complete the laying operations using a suitable sealant, while keeping at least a 3mm joint through the use of spacers.
 To make this task easier, use the special device for pulling over the slabs, available in the market.
 Levelling wedges at each linear metre of the slabs are recommended.
 After levelling process leave it for 8-10 hours, remove wedges once it gets dry.
