CARVING  
SURFACE

## INTRODUCTION

Metalic the unmistakable personality of raw concrete into elegant, highly realistic ceramic surfaces that faithfully reproduce its imperceptible roughness.

The effects of time, the inclusion of inert materials and the halo effect that results from water evaporation: the natural ageing of the cast concrete achieves a perfect expressive balance here and maximum chromatic harmony.

The new Metalic collection features ceramic concrete that is physically different and authentically unique. Its distinctive features confirm the brand's vocation for beauty: that innate tendency to increase the aesthetic appeal of every setting, whether residential or commercial, featuring multiple stylistic, architectural and cultural influences.
